Adapters are a great way to save time and money on any equipment change-out. With our adapters it's as simple as removing your existing unit, placing your new adapter, and setting your new equipment in place. Our adapters come standard with insulated duct transitions to save you time on duct connections. The top side of each adapter matches original equipment curbs perfectly to ensure a proper fit. Try our adapters on your next change-out and see how simple and cost effective it can be.
